

Multistacker

Trilo Multistacker

The Trilo Multistacker is the only machine in the industry which can harvest, stack rolls of turf and wrap the pallet on the go. This makes the Multistacker the most efficient machine on your sodfarm. One person can do it all by himself. Every roll of turf will be checked by the operator so only good rolls of turf will be stacked onto the pallet to ensure that a quality pallet will leave the machine time after time. When the pallet is stacked and finished it will be automatically wrapped into netting or shrinkwrap. Because all the four wheels of the Multistacker are in offset the weight distribution is very good and you can open up a new field without leaving any wheel prints in to the turf. There are different stacking patterns available which are easy to set. As easy as dialing a telephone number you can change the stacking pattern from the Trilo Multistacker.

Features

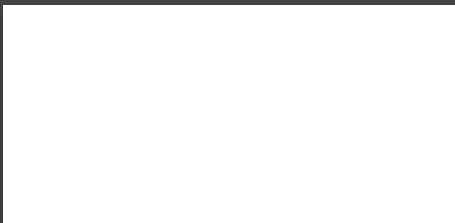

- Quality control on the go
- Synchronized main conveyor related to the ground speed
- Different stacking patterns (easy to set)
- All four wheels in offset
- Ideal weight distribution
- Automatic net wrapping
- Automatic shoe reset
- Rear unloading

Technical Specifications

Width:	300 cm	Cutterhead:	Brouwer SH 1576
Height:	330 cm	Thickness of cut:	Adjustable on the go
Length:	725 cm	Flapcontrol:	Adjustable on the go
Weight:	8.500 kg	Power:	Deutz 80kW (110hp)
Tires:	550/45-22.5	Transmission:	2 speed hydrostatic

Palletsizes:	0.8 x 1.2 m
	1.0 x 1.2 m
	1.2 x 1.2 m

Optional: Cabin, waste conveyor or palletinjector.
