## Trilo Pallet Wrapper

The new Trilo Pallet Wrapper gives you a high quality stable wrapped pallet of turf. This one man operated Pallet Wrapper saves time and labour. Trilo Pallet Wrapper is the answer for Turf Producers who are looking for a higher output in the field and a stable wrapped pallet of turf. The unique pre-stretch rollers provide an even stretch around the pallet of turf. The pre-stretcher is low maintenance and easy to work with. A new roll of film can be changed quickly and easily.

Top quality stacked pallets of turf depends on the plastic film being tightly wrapped. The hydraulic synchronization of the wrapping arm gives the finished pallets an even wrap all round. Controlled from the cabin, display, cut & tie system and the modern satellite wrapping makes the Trilo Pallet Wrapper an excellent choice. When offloading your pallet of turf the plastic film will be cut neatly when backing up, the film is then held down by a clamp ready to wrap a new pallet of turf.

Fast wrapping time with high volume output is achievable because of wrapping on the go whilst loading the pallets. The easy to operate Trilo Pallet Wrapper gives you maximum stability during loading and transport of your pallets of turf delivering an economic and efficient solution whilst increasing productivity and reducing costs.

### Key Features

- Flexible and versatile
- Rigid and solid design
- Easy to operate from cab seat
- Mechanical film cutter
- One man operation
- Can wrap with as many revolutions as required
- Fits every loader
- Capable of wrapping pallets up to 8 rolls high

### Technical Specifications

Overall width	1250 mm	Wrap Pallet size	0.8x1.2, 1.0x1.2, 1.2x1.2 mtr
Overall height	2140 mm	Film pre stretcher	1pcs/500 mm
Overall length	1800 mm	Wrapper	Single arm
Operating weight	+/- 600 Kg*	Max pallet load	1800 kg
Oil flow	15-45 Ltr/min		
Req. hydraulics	1x double acting 1x single acting		

\*Depending on brackets type to mount forklift or loader

The pallet wrapper will be delivered without brackets to fit loader and without hydraulic hoses.
